About us

has been developing and manufacturing office products since 2003. Originally, the manufacturing of self-adhesive filing and presentation products commenced in 1998 and was placed with our parent company Berg Group.

In 2008 we acquired HD-Design and the distinguished display systems. HD-Design has for years been known as the most focused and innovative manufacturer in the display system market. Display systems are in other words new to us.

Our product range includes display systems, QuickLoad pockets, self adhesive pockets and lamination etc. All our products help the end-user organize, protect and display.

Probeco specializes in OEM production, and thus supports the brands of manufacturers, dealers and buying groups providing own brand solutions. In several markets Probeco-brands like Probeco and QuickLoad are also well established. In other words we can provide your company with ready to use branded solutions as well as private label solutions. The choice is yours!

Probeco also provides a consumer products range and products for the graphic industry.

Enjoy the catalogue!

And please contact us if you have any questions.

QuickLoad®

Avoid trouble and damaged documents! It can be difficult to place documents in ordinary

pockets. It takes time, and the documents can be damaged. The Quick Load pockets have a

doublesided opening which ensures easy document loading and replacement of documents. Probeco provides the original QuickLoad®pockets in three versions: the display pocket, the magnetic pockets and the self-adhesive pockets. Available in many versions in A4 or A5 format.

Product features:

- **The display pockets is made from non-reflection PP-plastic. Can be used with all Probeco display systems.**
- **The self-adhesive QuickLoad® pockets can be used almost everywhere.**
- **The magnetic version provides you with information at hand on all magnetic surfaces.**
